

Abiodun Osagie-Raji (Biodun Raji)

Full-stack Engineer

raji.osagie.abiodun@gmail.com · abiodunraji.github.io · github.com/abiodunraji · Lagos, Nigeria

SUMMARY

Full-stack engineer who builds the whole system a problem needs, in whatever stack it needs. Mostly that is software: web and mobile products, APIs and data models, payments, back-office consoles, and AI agents that do real work behind safety gates written in code. Around it sits the operation: search and AI visibility, store and CMS work, monitoring and process. I run an independent studio for clients in Nigeria and the Netherlands; in 2026 that meant a 733-product retail storefront, a ticketed webinar platform and Dutch site and search work, alongside a live savings-circle product. I also co-founded a healthcare-marketplace startup as its CTO. In tech since 2010.

Taking on studio projects; open to senior and leadership roles in engineering, architecture, platform, data and AI, security and product, in any stack, and to operations, strategy, transformation and delivery work wherever a system can solve the problem. Based in Lagos: on-site or remote, worldwide.

SKILLS

Products	Web and mobile apps, APIs and data models, Payments, Marketplaces, Storefronts, CMSs
Operations	Back-office consoles, Monitoring, Process automation, CI/CD, Security hardening
AI & agents	Multi-agent pipelines, Agents behind coded safety gates, LLM features, AI-search visibility
Growth	Technical SEO, Search Console, Google Business Profile, Shopify, Conversion tracking
Delivery	Test-first, Playwright end-to-end, Scoping and fixed-fee pricing, Written client reports
Stack so far	TypeScript, JavaScript, Python, SQL, React / Next.js, Astro, Vue 3, React Native / Expo, Node.js / NestJS, FastAPI, PostgreSQL / Supabase, Neo4j, Redis, Cloudflare Workers, D1, R2, Docker, Vercel, Shopify, Sentry / Grafana

SELECTED PROJECTS

Ajoko [Product & engineering](#) · Live product 2025–present

A live record-keeper for rotating savings circles (ajo). It never holds anyone's money.

- Whole member lifecycle, onboarding to disputes; the first real circle completed with zero defaults.
- Staff back-office: monitoring, role-based access, support inbox, disputes console, audit log, announcements.

Next.js · React · Supabase (RLS) · PostgreSQL · Redis · Vercel · React Native / Expo

Marcplaats [Engineer](#) · Client project 2026–present

A hyperlocal photo-spotting app (PWA), in continuous delivery since May 2026.

- Business rules enforced in the database: row-level security, rate-limit triggers, CHECK constraints.
- GPS-first upload with map-pin fallback, Serwist PWA, Sentry; a failing Playwright test before every feature.

Next.js 15 · Supabase · PostgreSQL · Leaflet / Mapbox · PWA (Serwist) · Playwright · Sentry · Vercel

Retail storefront for a Lagos phone shop [Design, build & launch](#) · Client project 2026

A 733-product catalogue built around WhatsApp orders, with an owner panel.

- Workers, D1 and R2 store with an owner self-service panel; each WhatsApp tap counted as a conversion.
- Verified its Google Business Profile; homepage indexed and 774 pages discovered in Search Console.

Cloudflare Workers · D1 · R2 · Wrangler · Google Business Profile · Search Console

Webinar and events platform [Design & build](#) · Client project 2026

A Nigeria-first webinar and events platform with paid tickets, built for a client.

- Gated join links, Paystack ticketing, reminders by email, push and SMS, host analytics and recurring series.
- Designed its visual system from scratch; security passes took Dependabot alerts from 21 to 0.

Next.js 15 · Supabase · Cloudflare Workers (OpenNext) · Paystack · Resend · Termii · Web Push

Studio agents [Design & build](#) · Studio tooling 2026

Agents that run parts of my own studio: one writes code, one watches every live site, one operates a computer.

- Coding agent: plans, executes, verifies in a sandbox behind a hard safety gate; a human merges each PR.
- Watchman that checks every live site and files issues; computer-use agent with a coded kill switch.

Node.js · Claude Agent SDK · WSL sandbox · GitHub Issues · Windows automation

House of Faridah [Engineer](#) · Client project

2025–present

A multi-brand site for a Nigerian interior-design and construction company, with its own CMS.

- Two sub-brands in one app, an admin portal and a portfolio CMS with galleries and watermarking.
- Image weight cut from 61 MB to 8.5 MB; the Interiors page is interactive in 2–9 s, down from 27–90+ s.

React 18 · Vite · TypeScript · Radix UI · Tailwind CSS · Framer Motion · GitHub Pages

HealthBrew [Co-founder & CTO](#) · Co-founded company

2024–2026

A marketplace platform for healthcare professionals. Not launched; the code was archived in 2026.

- Built the whole platform: admin, backend API and data layer, with a Playwright e2e suite on self-hosted CI.
- Designed professional-license verification (about 50 files, 9,800 lines) behind a feature flag.

Next.js · Node · Prisma · PostgreSQL · Docker Compose · Playwright

Dreamy AI [Engineer](#) · Client project

2025–2026

A multi-agent platform that writes full-length novels from a concept. Handed to the client in 2026; on hold.

- 7-agent pipeline (concept → graph → blueprint → write → critique → polish) producing 80k+ word books.
- Neo4j knowledge graph for story continuity; a multi-critic/reviser quality system with ML quality prediction.

FastAPI · Vue 3 · PostgreSQL · Neo4j · Redis · Celery · LLM pipeline

MORE PROJECTS

Local-SEO agency website (NL) · Client project · 2026 — Google indexing from 3 of 14 pages to 11 of 13.

AI Visibility Check · Studio service · 2026 — Measures who AI assistants cite for a business, then ships the fixes.

SEO specialist's brand site (NL) · Client project · 2026 — Rebuilt the site and integrated a nine-route redesign.

Conference-venue SEO (NL) · Client project · 2026 — 20 pages fixed and 6 translated inside a booking CMS.

Doll-shop Shopify store (NL) · Client project · 2026 — Reopened the store; card contrast from 1.1:1 to 8.36:1.

Physio-practice directory (NL) · Client project · 2026 — Proof of concept ranking practices from public map data.

My Record Label · Studio product · 2026 — Catalogue, royalties and artist portal for labels. Not launched.

In-home massage booking marketplace · Product build · 2026 — Two-sided, with an ops console. Not launched.

News-reading browser extension (MVP) · Client project · 2026 — Highlights how a news article is constructed.

BetGist · Studio product · 2026 — Betting previews, odds comparison and a public record of settled picks.

EDUCATION & TRAINING

Diploma — Folu Computer Institute

2007–2010

Formal computing diploma that launched a tech career; in the industry ever since — in-house roles at several businesses, then full-time freelance, project-based engineering.

Self-taught, production-first

2010–present

Modern stack (TypeScript, React/Next.js, Node/NestJS, Python/FastAPI, Postgres/Supabase, Docker, CI/CD, Playwright e2e) learned by shipping real products — see Selected projects.
