Ajoko's first live circle, 7 members	image weight cut on a live site	WhatsApp-first Lagos store	shipping software since

SUMMARY

Full-stack engineer who builds whole systems, including AI agents that do real work behind safety gates written in code. I write the checks that judge AI output and tests that try to walk around a guard, and build test-first with AI coding agents. I run an independent studio for clients in Nigeria and the Netherlands.

SELECTED WORK

Ajoko — Product & engineering · Live product — 2025–present

A live record-keeper for rotating savings circles (ajo). It never holds anyone's money.

ajoko.ng

- Whole member lifecycle, onboarding to disputes; the first real circle completed with zero defaults.
- Built test-first: the failing test lands before each change; 200 end-to-end Playwright tests run on every PR.
- WhatsApp login (Meta Cloud API): a member proves their phone by sending a one-time code; webhooks are signature-checked.

7 members · 0 defaults

200 end-to-end tests

Next.js · React · Supabase (RLS) · PostgreSQL · Playwright · WhatsApp Cloud API · Vercel · first version in React Native / Expo

Marcplaats — Engineer · Client project — 2026–present

A hyperlocal photo-spotting app (PWA), in continuous delivery since May 2026.

marcplaats.com

- Business rules enforced in the database: row-level security, rate-limit triggers, CHECK constraints.
- GPS-first upload with map-pin fallback, Serwist PWA, Sentry; a failing Playwright test before every feature.

43 Playwright tests

Next.js 15 · TypeScript · Supabase · PostgreSQL · Leaflet / Mapbox · PWA (Serwist) · Playwright · Sentry · Vercel

Retail storefront for a Lagos phone shop — Design, build & launch · Client project — 2026

A 733-product catalogue built around WhatsApp orders, with an owner panel.

- Workers, D1 and R2 store with an owner self-service panel; each WhatsApp tap counted as a conversion.

733 products

Cloudflare Workers · D1 · R2 · Wrangler · Google Business Profile · Search Console

House of Faridah — Engineer · Client project — 2025–present

A multi-brand site for a Nigerian interior-design and construction company, with its own CMS.

houseoffaridah.com

- Image weight cut from 61 MB to 8.5 MB; the Interiors page is interactive in 2–9 s, down from 27–90+ s.

61 → 8.5 MB

React 18 · Vite · TypeScript · Radix UI · Tailwind CSS · Framer Motion · GitHub Pages

SKILLS

Stack so far TypeScript, Python, JavaScript, SQL, Node.js / NestJS, FastAPI, React / Next.js, PostgreSQL / Supabase, Playwright, Neo4j, Redis, Celery, Cloudflare Workers, D1, R2, Docker, Vercel, Astro, Vue 3, React Native / Expo, Shopify, Sentry / Grafana

AI & agents Agents behind coded safety gates, Checks that judge AI output, Tests that try to walk around a guard, Multi-agent pipelines, LLM features, AI-search visibility

Delivery Test-first, Playwright end-to-end, Scoping and fixed-fee pricing, Written client reports

Operations Back-office consoles, Monitoring, Process automation, CI/CD, Security hardening

Products Web and mobile apps, APIs and data models, Payments, Marketplaces, Storefronts, CMSs

Growth Technical SEO, Search Console, Google Business Profile, Shopify, Conversion tracking

EDUCATION

Diploma — Folu Computer Institute — 2007–2010

In the industry ever since: IT Manager at Amazon Studio, Lagos, and other in-house roles, then full-time freelance.

Self-taught, production-first — 2010–present
